

# GLOBAL NEED CREATED A PRODUCT

Clean Touch Medical LTD manufactures antibacterial solutions for use in various fields. Our objective is to eliminate viruses and bacteria from contact surfaces and from the air and thus break the infection chains at the earliest possible stage. We want to create not only efficient products, but also fast-acting products. Hours or minutes are not enough for us, viruses and bacteria must be eliminated within seconds.

**“** *We want to create a new standard of protection against viruses and bacteria.*

The temporary protective coating we have developed reduces the need for constant cleaning, as the coating automatically eliminates bacteria and viruses.

## WHY PROTECT CONTACT SURFACES?

Bacteria and viruses spread quickly from the contact surfaces, so only thorough cleaning after each individual, that is nearly impossible, would ensure a clean microbial-free surface for the next person.

We wanted to solve this problem.  
Effective elimination of infection chains requires efficacy in seconds.

**Our protective coating eliminates bacteria and viruses in seconds and breaks the infection chain right away.**

It is no longer necessary to clean the surface between contacts, even if the first contact carries a disease bacteria or virus on their hands.

CTM ViralSafe is the most effective temporary protective coating on the market. It eliminates most common viruses and bacteria such as;

- SARS-CoV-2 (latest form of coronavirus)
- Influenza A H1N1 (swine flu)
- SARS-CoV-2 Variant B.1.1.7
- H5N8 (bird flu)
- Norovirus
- RSV
- **MRSA (under test)**
- Salmonella
- Listeria

*CTM created a new standard of protection.*  
**THIS IS NOW THE NEW NORMAL!**

## VIRUS-FREE AIR

Our latest product is a ViralSafe filter that eliminates virus aerosols from the air.

Our R&D team works hard and is constantly searching for new ways to protect ourselves even better against harmful microbes.

The ViralSafe filter can be installed as a pre- or post-filter in every air conditioner, ventilation machine, heat pump or air purifier.

Material is thin and easy to cut in to any shape or dimension.
